Timeware Primetime Solution
Release Notes

Version 6.11.1.00

Scheduled Release Date: 04/15/2011

The Timeware Primetime release notes document describes changes made to the system since the last official release of the product. The release notes are organized under 4 sections: User Reported Requests, Additions & Enhancements, Reporting Issues and Reporting Update.

Should you have any comments or feedback regarding the content of this document or should you have any suggestions for us to improve the content or delivery method of this document please let us know. We thank all our clients for their continued support and participation.

User Reported Requests/Issues:

- *Attendance Summary Screen* - User request to provide an attendance screen where the user can see at glance all exceptions and summaries for one employee or an entire department.
- *Time Charge Mass Compute* - User request to provide a function for mass computing time charges.
- *Accrual Reconcile On Date* – User request to specify a custom reconcile on date for accrual rules.
- *Manage Additional Pay like license and other pay incentives* – User request to add extra pay rule to covers license pay and other extra pay types.
- *Enable shift split option on per job basis* – User request to control shift split at the job level.
- Hide not applicable fields in Time Charge Detail dialog.
- Allow for multiple account codes with split percentage per job.

Response to User Reported Requests/Issues:

- An attendance summary screen has been added and labeled Reconcile Attendance screen. Not only charges summary and exceptions are displayed, but the screen is split 3 ways that shows individual employee attendance detail and individual time charge detail for viewing and editing. A right click menu is also available to execute other needed functions.
- Time charge mass compute function has been added.
- Mass compute is now available from the Attendance module. It can be initiated by right clicking the mouse over the attendance calendar then select the Mass Compute function.
- Added the ability to define and assign Extra Pay from the payroll module.
- Added a shift split option on the job attendance setup screen..
- Enhanced the Time Charge Detail dialog.
- Added 4 additional job account code fields to the job payroll codes screen.

Additions & Enhancements

- Enhanced the payroll export screen as follows:
 - added a tool bar where all the screen buttons are located.
 - Added the ability to select any combination of business units, groups and employees as a data set to be used for the payroll export. This data set can be named and saved for repetitive use.

- Full implementation of AESOP automatic web interface for loading leave data.
- Full implementation of Formshare automatic web interface for loading leave data.

Reporting issues

- none.

Reporting Update:

- Added “Shift Diff” column to all “Payroll Hours Summary – By Employee” report.
- Improved the “Clock Break Punch” report to only include time charges with break punches.
- Added a “Sort By Position” option for All of the attendance “Payroll Hours Summary – By Employee” reports.
- Added a “Shift Diff” and “Shift Premium” values to All of the attendance “Payroll Hours Summary – By Employee” reports
